

ALCHIMIE DI GRANO

PASTAI SANNITI

WHY PASTAI SANNITI IS DIFFERENT

ENG

- ① PROFESSIONAL PORTION
- ② LARGE SEMOLINA GRAIN
- ③ VACUUM EXTRUSION
- ④ SLOW DRYING
- ⑤ LOW GLUTEN INDEX WHEAT
- ⑥ NO STARCH RELEASE

70 g instead of 100 g.
More yield in cooking. Designed to reduce waste.

500 microns.

Preserves gluten structure.

Below 44°C.

Higher digestibility.

Professional kitchens stay clean.

Giuseppe Iannotti
Chef and founder of Krèsios, two Michelin stars.

Through Pastai Sanniti he brings the same obsessive research on grain selection, drying and texture developed in his restaurant.

Pastai Sanniti is not an industrial pasta brand.
It is pasta conceived by a chef.

PERCHÉ SCEGLIERE PASTAI SANNITI ^{IT}

① PORZIONE PROFESSIONALE

70 g invece di 100 g. Maggiore resa in cottura. Progettata per ridurre gli sprechi.

② SEMOLA A GRANA
GRANDE

500 micron.

③ ESTRUSIONE SOTTOVUOTO

Preserva la struttura del glutine.

④ ESSICCAZIONE LENTA

Sotto i 44°C.

⑤ SEMOLA DI GRANO DURO
A BASSO INDICE DI GLUTINE

Maggiore digeribilità.

⑥ POCHISSIMO RILASCIO
DI AMIDO

L'acqua dopo la cottura resta pulita.

Giuseppe Iannotti
Chef e founder di Kresios, due stelle Michelin.

Con Pastai Sanniti porta avanti la stessa ricerca meticolosa sulla selezione dei cereali, l'essiccazione e la consistenza che ha sviluppato nel suo ristorante.

Pastai Sanniti non è una pasta industriale.
È una pasta ideata da uno chef.

PERCHÉ SCEGLIERE ME?

La pasta di Pastai Sanniti nasce da grano coltivato sul pianeta Terra, con una selezione dei migliori grani italiani e internazionali, scelti per garantire un basso indice di glutine e un alto contenuto proteico.

Ogni fase della produzione è pensata per preservare la qualità e il benessere: l'impasto viene estruso sottovuoto e raffreddato delicatamente per proteggere la maglia glutinica, mentre la lenta essiccazione a basse temperature garantisce una texture perfetta e una maggiore digeribilità.

E diciamo cello: chi non si è mai trovato con tanti pacchi di pasta avanzati perché i classici 500 grammi non si dividono mai per il numero di ospiti a tavola? Con le nostre confezioni da 980 grammi e porzioni ottimizzate da 70 grammi, questo problema è solo un ricordo!

Essendo più essiccata e con meno umidità, la pasta si espande di più in cottura. Una pasta innovativa, ideale per affrontare le nuove sfide di intolleranze e allergie alimentari senza rinunciare al gusto.

Pastai Sanniti's pasta is made from wheat grown on planet Earth, using a selection of the finest Italian and international grains chosen to ensure a low gluten index and high protein content.

Every step of the production process is designed to preserve quality and well-being: the dough is vacuum-extruded and gently cooled to protect the gluten structure, while slow drying at low temperatures ensures perfect texture and greater digestibility.

Let's be honest: who hasn't been left with leftover pasta because the classic 500-gram packs never divide evenly among guests? With our 980-gram packs and optimized 70-gram portions, this is a problem of the past!

Being more dried and with less moisture, our pasta expands more during cooking. An innovative pasta, ideal for tackling new challenges of food intolerances and allergies without compromising on taste.

LE ORIGINI DEL MITO DEL
FOLLETO E IL PASTIFICIO
MAZZAMAURIELLO

Si racconta che nei vecchi pastifici sanniti, dove si lavorava fino a tarda notte, si lasciava sempre un piatto di pasta pronto per il Mazzamauriello.

Questa era un'antica usanza per ingraziarsi il folletto e garantirsi una produzione di pasta senza intoppi. Se il piatto veniva lasciato, il folletto si assicurava che tutto funzionasse al meglio: gli strumenti non si rompevano, la farina non si disperdeva e la pasta era sempre perfetta.

It is said that in the old pasta factories of the Sannio region, where work continued late into the night, a plate of pasta was always left ready for the Mazzamauriello.

This was an ancient tradition to gain favor with the sprite and ensure a smooth pasta production. If the plate was left out, the sprite would make sure everything ran perfectly: the tools wouldn't break, the flour wouldn't spill, and the pasta would always turn out perfect.
